EXPERIENCE

DCI Marketing <i>Interactive Web Developer</i>	July 2020 - Present <i>Milwaukee, WI</i>
PartsBadger <i>Web Developer</i>	June 2018 - July 2020 <i>Milwaukee, WI</i>
University of Wisconsin-Milwaukee <i>Web Developer</i>	July 2016 - April 2018 <i>Milwaukee, WI</i>

PROJECTS

DCI Marketing - Oculus Project

Brought in to help with an Oculus project which was thought to be impossible given the timeline and requirements. Was able to finish the front-end far ahead of schedule. This gave headroom to work on remaining requirements that allowed the project to be delivered on time while retaining the client.

PartsBadger - Custom E-Commerce Platform

Developed an e-commerce platform that consumed a multitude of PartsBadger micro-services that allows customers to interact with all of PartsBadger's processes end-to-end. Gives users the ability to customize quotes and instantly get new prices with just a 3D file using an in-house quoting algorithm.

PartsBadger - Vendor Management System

Developed a web application that allows vendors to manage their quotes, shipments, returns, and material certification on products that PartsBadger sells to customers. This created an efficient and thorough supply chain for PartsBadger.

EDUCATION

University of Wisconsin-Milwaukee Bachelor of Business Administration Information Technology Management	December 2017
--	---------------
